

Numbers — they go on forever; or — as some mathematicians will tell you — forever... plus one. This book deals with the first 21 of them, zero to 20. Why only those numbers? Because these are Joe Spooner's favorites. (And who wants to read a book about 8,437 tadpoles swimming in the lake or 142,819 mosquitoes swarming at the park? And who wants to count them?)

Sit down with your child — sit down with two or several or them... borrow some if you need to — and enjoy the detailed illustrations, the silly rhymes and the interesting facts that fill each page.

12 Pugnacious Penguins is a fun book to read... **over and over and over again.**

For pre-publication orders:
